

A community that remembers.

From the first message to the next verified outcome.

Built with Strands Agents

AWS + Amazon Bedrock AgentCore

Northgate / synthetic community

DESIGN PRINCIPLES

Designed for follow-through.

01

Evidence first

Every recommendation points back to a source.

02

Bounded authority

People set the policy.
Code enforces the limits.

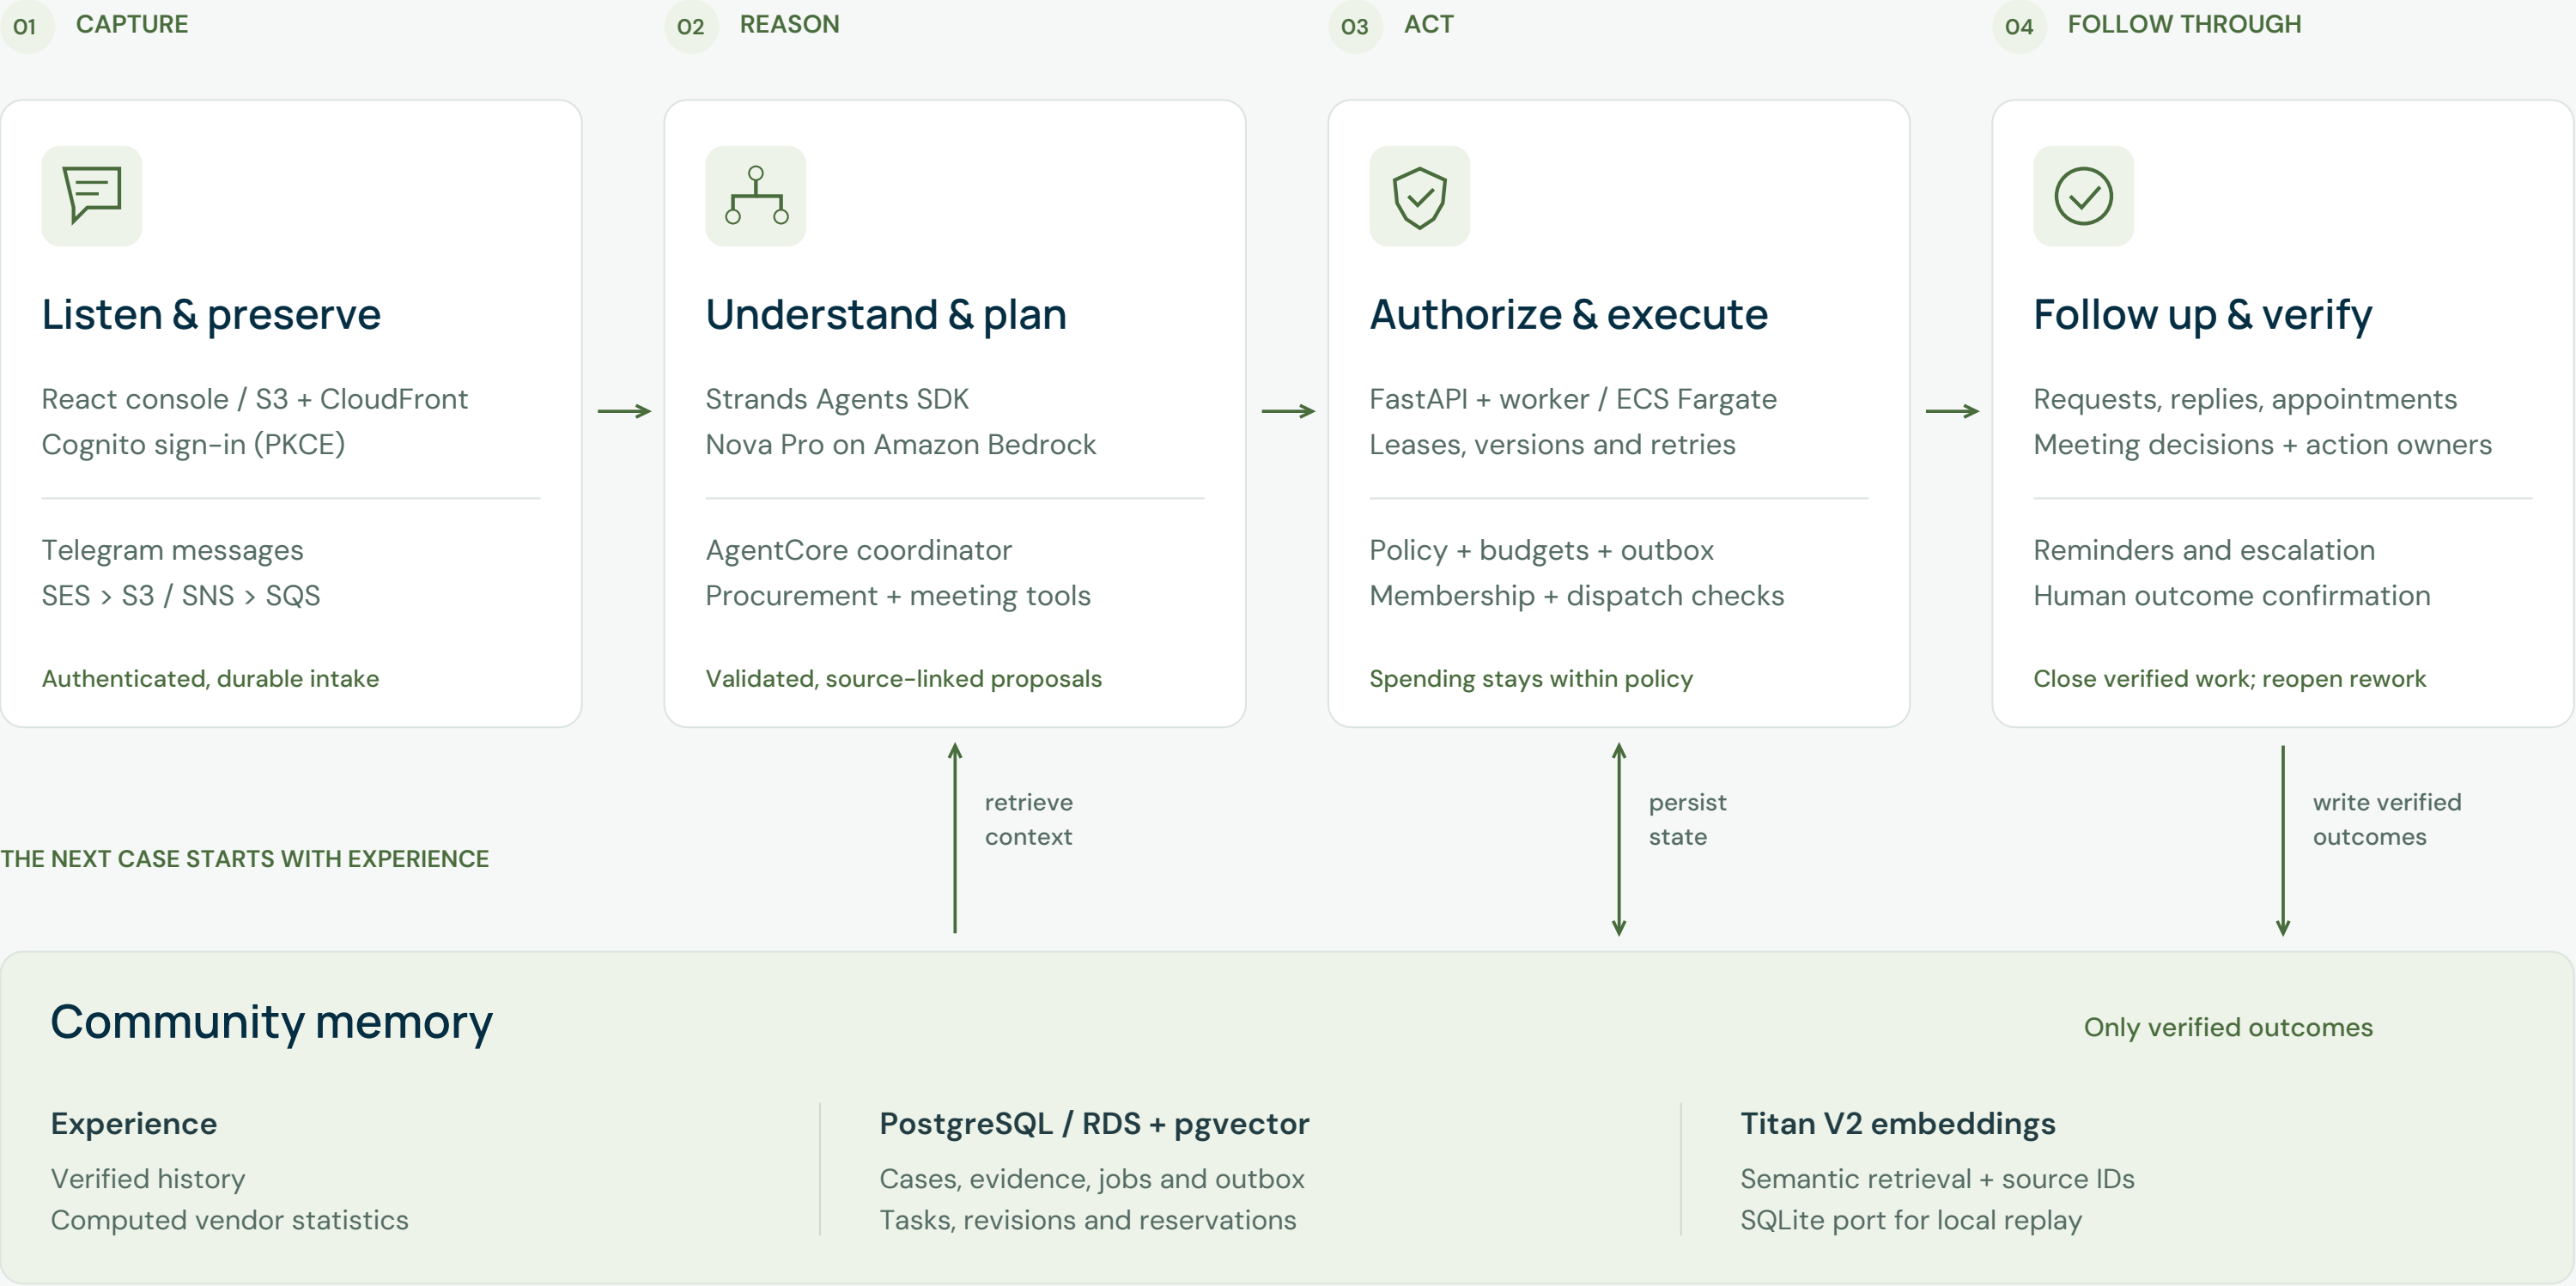

03

Persistent follow-up

Open work survives
silence and restarts.

A little less to manage.
A community that
remembers.

GOOD NEIGHBOR AGENTS

DEMO BOUNDARIES

● **Live on AWS**

Bedrock inference + Telegram
intake and notifications.

● **Controlled / simulated**

Hosted vendor mail and orders simulated.
SES roundtrip tested separately.

● **Evaluation scope**

Synthetic Northgate; offline model fixtures.
No real repairs or measured savings.

Supporting services: Secrets Manager, CloudWatch and private encrypted RDS.

Source: architecture, Telegram delivery and controlled-mail evidence in the project repository.
