

STEWARD

From community messages to verified outcomes and reusable memory

AGENTS FOR HUMANS

Good Neighbor Agents

01 PEOPLE & CHANNELS

Residents & managers
React console / S3 + CloudFront
Cognito sign-in (PKCE)
Linked Telegram group + private bot

Vendor email intake
SES receipt rules
S3 raw mail + SNS metadata
SQS durable receipt queue

Evidence boundary
Northgate seed data is synthetic.
Workflow time can be advanced.
Model inference is real in cloud.
No real repair or measured
community savings are claimed.

02 DURABLE APPLICATION

FastAPI + worker / ECS Fargate
Authenticated intake, cases and evidence
Leased jobs, retries, version checks and idempotency
Maintenance + community decision workflows

Deterministic action authority
Category autonomy, membership and vendor allowlists
Valid quotes, spend limits and atomic reservations
Dispatch-time checks, emergency stop, outbox
Human confirmation for decisions and final outcomes

Delivery, follow-up and verification
Telegram: live linked-group notifications verified
Hosted vendor RFQs / orders: simulated
SES: real controlled roundtrip tested separately
Chase overdue work; close only after verification

03 REASONING & MEMORY

Strands Agents on Bedrock
Nova Pro: triage, extraction and planning
AgentCore-hosted Strands coordinator
Read-only evidence and history tools
Procurement / meeting specialists
Validated proposals with source IDs

PostgreSQL / RDS + pgvector
Cases, evidence, jobs and outbox
Tasks, revisions and budget reservations
Verified history + vendor statistics
Titan V2 semantic embeddings
SQLite port for local/offline replay

THE CONTROL LOOP

Problem > Evidence > Plan > Authorized action > Follow-up > Verification > Memory

AWS support: Secrets Manager, CloudWatch, private encrypted RDS and private API load balancer.
